**Re: Shuttleworth Creek Diversion Removal and Well Implementation Project**

Dear Mr. Barling,

Okanagan Nation Alliance would like to acknowledge you for your generous contribution to the Shuttleworth Creek Diversion Removal and Well Implementation Project. The previous 12" drilled well in 2012 posed many problems and after a lot of work and money, the well was deemed unusable for the project. In the summer of 2013, you and your crew came back to the site to drill a 6" pilot well and drill and test two 10" production wells. The entire cost of the labour, supplies, and transport for this work was donated by Wild West and was no doubt a huge expense and time commitment your company. The success of these wells means that the project can continue with the end goal of restoring fish flows in Shuttleworth Creek.

We are very thankful and appreciative for Wild West Drilling's generous contribution.

Yours truly,

**OKANAGAN NATION ALLIANCE**
